

Billy Kitchens is a Project Engineer at Underwood Engineers, he recently joined Underwood Engineers after graduating from UNH in May of 2018 with a B.S. in Civil Engineering. Billy enjoys spending time outside regardless of the season, from local one day hikes with his two teenaged daughters, to winding down a river in a day long kayak excursion to tent camping in New England State Parks. Billy also enjoys restoring old equipment and vehicles, from a 1954 Delta Unisaw to a 1972 Norton Commando Interstate, to name a few. Another favorite family activity is finding a recipe online or in an old cook book, making a shopping list and venturing to the grocery store to pickup the ingredients, putting on some jazz and having a true family meal.
