

I am a New Hampshire native; born and lived in Keene through High School, attended the New Hampshire Technical Institute (architectural engineering) and the University of New Hampshire (civil engineering), and have worked in New Hampshire since graduation. I truly love and enjoy everything that New Hampshire has to offer and have shared things like camping, skiing, hiking, Storyland, Canobie Lake Park, lakes/river, my parent's lake house, and ocean with my 3 daughters. Even though my daughters are out of high school, they have continued to enjoy many of the same things we enjoyed while they were young. I have resided in Milford since 1991 and have enjoyed the quaintness of the Town and surrounding area. I enjoyed playing rugby before my daughters were born, being active in my daughter's upbringing and sports career, and now I have transitioned into watching my daughters grow into successful young women while I explore new adventures. In retirement, I look forward to working in my woodworking shop; however, I have a few more years before that happens.
