

Tom has a diverse and unique background in engineering and design that has, lead to his success on a variety of projects. Tom grew up on the coast of Maine, sailing and working on classic wooden boats. He also designed and built several canoes and kayaks. Tom studied mechanical engineering at the University of Maine, which led to a different kind of boat work: testing nuclear submarines at the Portsmouth Naval Shipyard. He then switched gears to pursue an advanced degree in environmental engineering at the University of New Hampshire. Tom has been with Underwood Engineers in Portsmouth NH since 1997 and is currently a Project Manager. He is also a member of American Water Works Association and Water Environment Federation. Outside of work, Tom is a licensed amateur radio operator and has completed more than 50 ultrarunning events up to 100 miles long.
