

Steve has enjoyed the journey at Underwood Engineers. The opportunity for personal and professional growth has led to many interesting events in his life. Work and travel have joined together in a blissful period of education, enjoyment and happiness. Some of the areas of the world that Underwood Engineers growth path allowed included journeys to Oregon, Montana, New York, Chicago, Washington DC and Toronto Canada. While learning the engineering aspects of environmental treatment, he also is interested in the history of engineering, attending such events as the 100-year celebration of the invention of the activated sludge process. Steve lives with his wife Susan of 37 years along with his son, the last of five children raised in the Sandown homestead. His time after work is filled with 11 grandchildren, New England Patriots Sundays and ham radio operating events.
