STONEHILL COLLEGE

## CONNIE'S BIO

Connie joined the Underwood team in 2019 for her first project engineer role post-graduation. She completed a five-year, 3-2 dual degree engineering program with Stonehill College in Massachusetts and the University of Notre Dame in Indiana. She graduated from Stonehill with a BS in Environmental Science in May 2018 and from Notre Dame with a BS in Environmental Engineering in May 2019. She chose this path in order to gain an understanding of environmental systems and the issues they face, along with how to engineer solutions and contribute to positive environmental change.

Connie grew up in mid-coast Maine and finds her happy place at her family's camp on Frye Island, ME in Sebago Lake. There her time is filled at the beach, with friends and family, and the occasional round of golf. She is also an avid ultimate frisbee player, finding it is the easiest way to meet people everywhere new that she goes. She has played competitively for club teams at Stonehill, Notre Dame, and most recently for the seacoast team FaceOff. She is also an artist in her spare time, mainly through ceramic art, and more recently painting.

Connie will always call New England home, but will take advantage of travel at any given opportunity. Two days after graduating from Notre Dame, she traveled to 7 European countries within 21 days alongside her sister. She hopes to have many more adventures in the coming future.
