## JACOB'S BIO

Jacob has been with Underwood Engineers as a Project Engineer since June 2019 after obtaining his Undergraduate Degree in Environmental Engineering from the University of New Hampshire. He began his career interning for the City of Portsmouth, NH at the Pease Wastewater Treatment Facility where he performed lab analyses, data collection, and involvement in a wastewater characterization study (ironically with the guidance of Underwood Engineers).

He enjoys spending most of his summer weekends hiking, camping, kayaking, and playing the guitar next to the campfire. When it gets cold, he moves to the ski resorts to enjoy skiing the fresh powder. The main reason he got into this career was to protect these resources from depletion due to negative human interactions with the environment.
